## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1,3 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Michot et al. US 6,841,304.

3. This patent teaches the claimed ionic liquids, see column 1 lines 18+. These liquids are disclosed as being added to polymeric compositions, see column 6 lines 6+. Within this listing of polymers are rubber forming resins, see lines 8 and 9. These polymers are further disclosed as being crosslinked, see line 25. The suggestion of rubber polymers and crosslinking thereof is considered to render obvious vulcanized rubber as claimed. One of ordinary skill would be motivated to select the rubber polymers given that they are disclosed in list form. Further, one would be motivated to vulcanize the rubber given the direct suggestion to crosslink the polymers disclosed. Vulcanization is seen to be a species of crosslinking. As such, the claims are rendered prima facie obvious.
